**JOINT INTERAGENCY & BOSASO MUNICIPALITY FIRE OUTBREAK ASSESSMENT
IN BULLO-MINGIS AND DHOTO CAMPS
(COMBINED RESULTS WITH PREVIOUS 2ND AUGUST 2008 ASSESSMENT)**

Conducted by:- UNHCR, DRC, NRC, HABITAT, SRCS, OCHA and local authority

Locations assessed: Bulo Mingis, and Bulo-Dhoto camps.

Date of assessment: 13 August 2008

Back ground

Bosaso is one of the cities in Puntland that hosts large number of IDPs from all parts of Somalia, especially from southern regions due to the on-going fighting. Majority of the IDPs are from neighboring country of Ethiopia where Somalis and Oromas cross the boarder between the two countries looking for safer place than their home of origin and some times looking for better living status. Host community including Government and the aid agencies provided some assistance to the IDPs initially and facilitated integration of some of them into the host community. Others were assisted by aid agencies and UNHABITAT by sheltering them in constructed permanent shelter/houses.

Apart from the integrated IDPs to the host community and those residing in the permanent constructed houses, there are thousands of IDPs that live in simple shelters or huts made of local materials (mainly sticks, cartons and clothes) which are susceptible to fire. During the summer time especially from May to September, heavy winds occur in Bosaso and its surrounding area which facilitate fire outbreaks in IDP settlements resulting in loss of properties and sometimes lives of human.

On 16th, 23rd and 24th fire outbreaks occurred in the camps of Absame A, Girible, Ajuuran and Bulo-Mingis that affected around 205 families. Humanitarian agencies conducted an assessment aiming to respond to the crisis, where action points and roles of each organization was put in place, **but after one day of assessment** (on 4th of August 2008) another fire out break occured in Bulo-Mingis where one 7 year old child died and again, on 8th of August 2008 another fire out break occurred in Bulo-Mingis and Bulo-Dhoto, where fire destroyed all properties of 454 IDPs families.

On 9th August 2008, OCHA Bosaso organized another fire outbreak ad hock meeting of all humanitarian agencies to discuss the issue of the new fire outbreaks plus revision of the previous fire outbreaks assessment to determine the type of responses for the fire affected IDPs. During the meeting, it was agreed to postpone the planned 9th of August

NFIs distribution based on previous assessment's results and to conduct new assessment and combined the results with the previous assessments of 2 August 2008. Based on the decision of the meeting, a joint inter-agency assessment was carried out on 13th August 2008 in Bulo-Mingis and Bulo Dhato fire affected IDP settlements.

Objective of the Joint Assessment:

The objective was to know the magnitude of the fire outbreak, determine number of affected houses, and recommend possible joint response actions.

Methodology:

- Team split in to three groups that each was assigned in specific areas that demarked small roads between the houses to avoid writing twice in a person.
- Community committees of the target beneficiaries were part of the team to identify the real beneficiaries of the affected families.
- Every head of HH was requested to sit on his/her burned shelter place for easy identification and clarifications of owner before fire outbreak
- House to house registration was carried out to ensure actual affected families were identified and their names recorded properly
- During the interview, actual number of each HH and items lost were recorded.
- The team was also ensuring and verifying if the burnt houses were real one by checking debris of the fire.

Findings of the assessment

- 454 families were identified as victims of the fire out break in the last two fire outbreaks of Bulo-Mingis and Bulo-Dhoto (i.e.409 in Bulo-Mingis and 45 families in Bulo-Dhoto) in east of Bosaso.
- Bulo-mingis is the worst affected settlements by the fire out break
- Implementation of shelter upgrading projects in IDP settlements reduced frequency of fire outbreaks in the camps.
- Fire killed one child of 7 years and destroyed all properties of the fire affected IDP families.
- Interview with the IDP affected families proved that the fire was not intentional but accidental.

Number of identified victims in the last assessment was 454 families, whereas the previous assessed victims were composed 205 families. So, the total of the affected families that found with in the two assessments were composed of **659** families.

The below table is summarized both current and previous finding figures:-
